fall 2024

PROJECT OVERVIEW

KDOT is completing early design work for a project that will replace the Stover Road bridges over U.S. 24 in north Topeka. This project is part of the KDOT Priority Bridge Replacement Program.

Replacement of the existing two bridges is necessary, as the structures are at the end of their service life. The project will reduce future maintenance needs and enhance connectivity from U.S. 24 to area businesses, homes and community locations.

Improvements will include providing new fully paved shoulders and additional clearance for trucks traveling on U.S. 24 under the Stover Road bridges.

The latest project information will be made available on the project webpage: ike.ksdot.gov/stover-road-bridges-us24

Project location

IKE—The Eisenhower Legacy Transportation Program—is a nearly \$10 billion investment in the future of Kansas. This 10-year program and the transportation improvements it will deliver play a key role in making roads safer, supporting economic growth and creating more options and resources for Kansans and their communities.

PROJECT DETAILS

Scope	Replacing the two existing bridges, which involves roadway design, bridge design, traffic analysis, traffic modeling, developing a Transportation Management Plan, and community engagement.
Status	Early design

PRIORITY: Collaboration

KDOT is coordinating with the City of Topeka and Shawnee County on the replacement of the two bridges. Planned improvements are in alignment with the City of Topeka Comprehensive Plan 2040. The areas surrounding the U.S. 24 interchange are expected to remain primarily as commercial and industrial land uses.

COMMUNITY: Open House

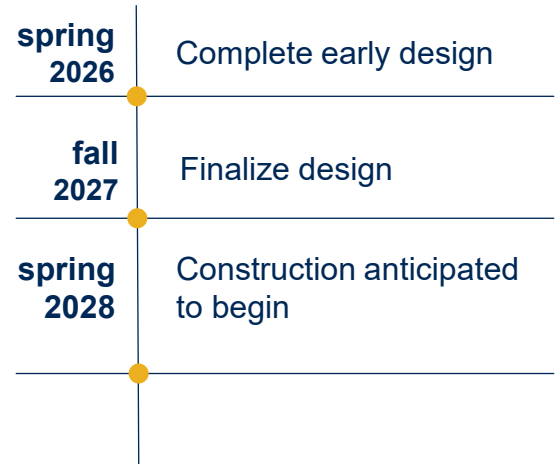

KDOT planned and hosted an informational open house in November 2024. Members of the public attended to learn more about the Stover Road Bridges over U.S. 24 project and meet the project team. Information was also available about other projects that are being planned and in construction along the Topeka U.S. 24 and I-70 corridors.

Details of the public meeting are shared and posted to the project website and KDOT social channels.
