**U.S. 54 Bridge (025)  
over the Walnut River**  
*Butler County*

# Project Location

The potential project area concerns the replacement of the existing U.S. 54 Bridge (025) over the Walnut River, located on the eastern edge of El Dorado.

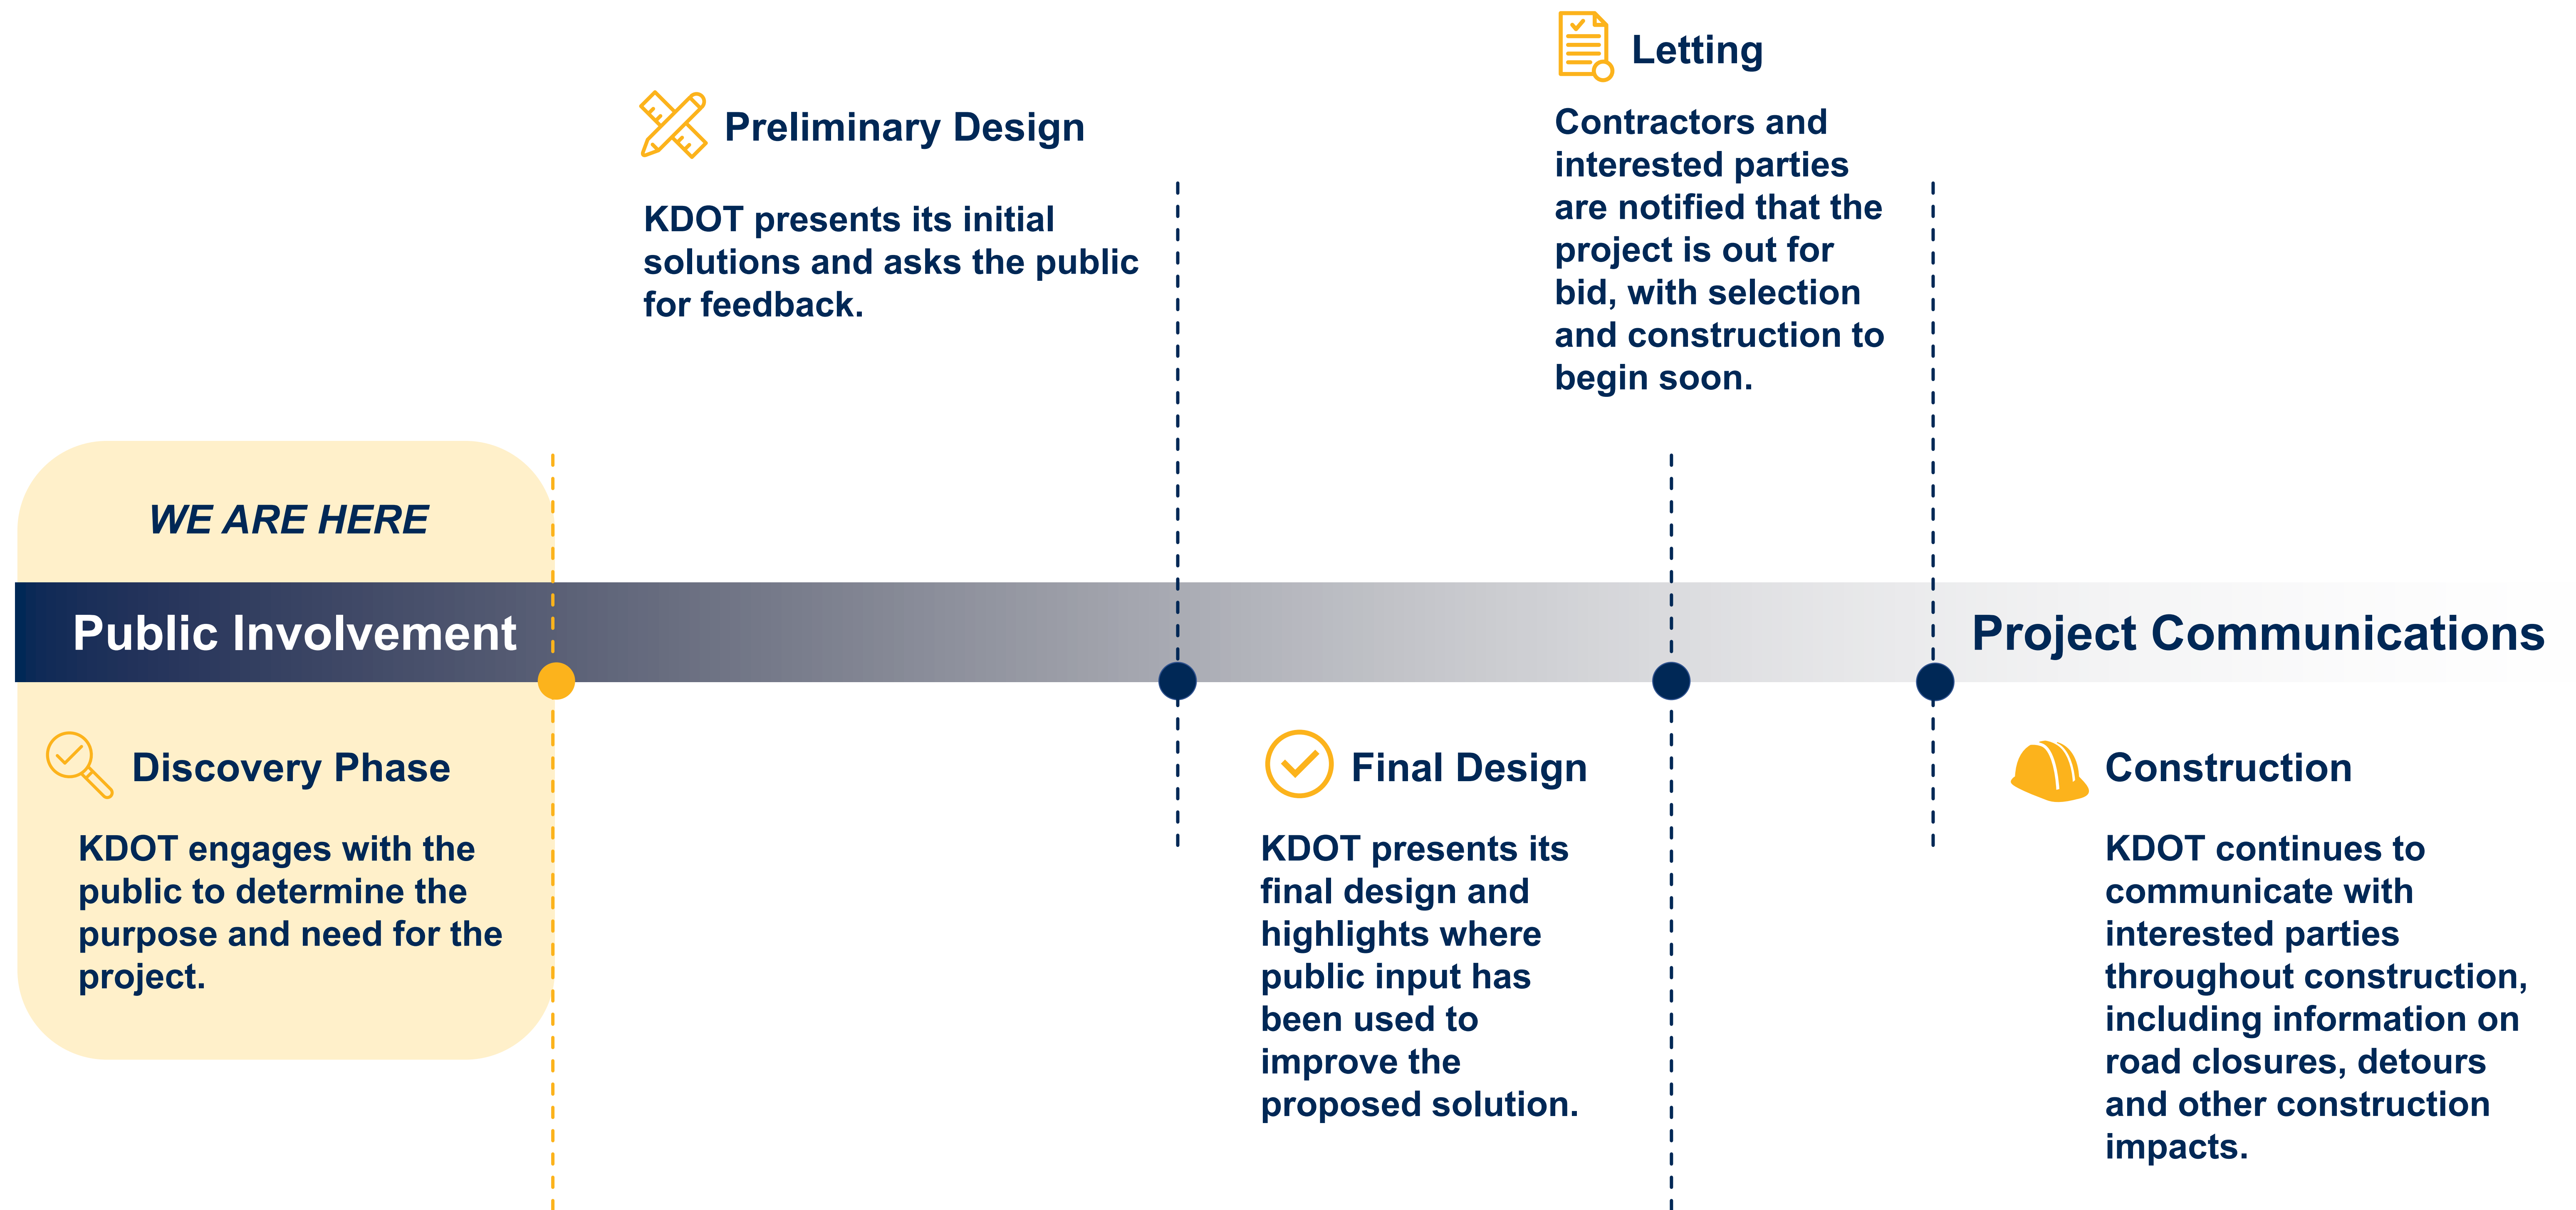

# Project Timeline

Public involvement and communications work together throughout a project's lifecycle.

# Project Description

The KDOT Project involves the replacement of the U.S. 54 bridge over the Walnut River, on the eastern edge of El Dorado. A BNSF railroad overpass bridge crosses U.S. 54 from north to south, posing project constraints for the future replacement design.

KDOT implemented this Discovery Phase Project to begin investigating various alternatives in coordination with project stakeholders City of El Dorado, Butler County and BNSF. Preliminary Design and Final Design Phases will follow the selection of a preferred alternative as developed in this project phase.

The purpose and need of the project is the effective and efficient replacement of the U.S. 54 Bridge (025) with a sustainable design that addresses the functional and structural needs of KDOT, Butler County, El Dorado and the greater region.

**U.S. 54 Bridge (025)  
over the Walnut River**  
*Butler County*

# Proposed Project

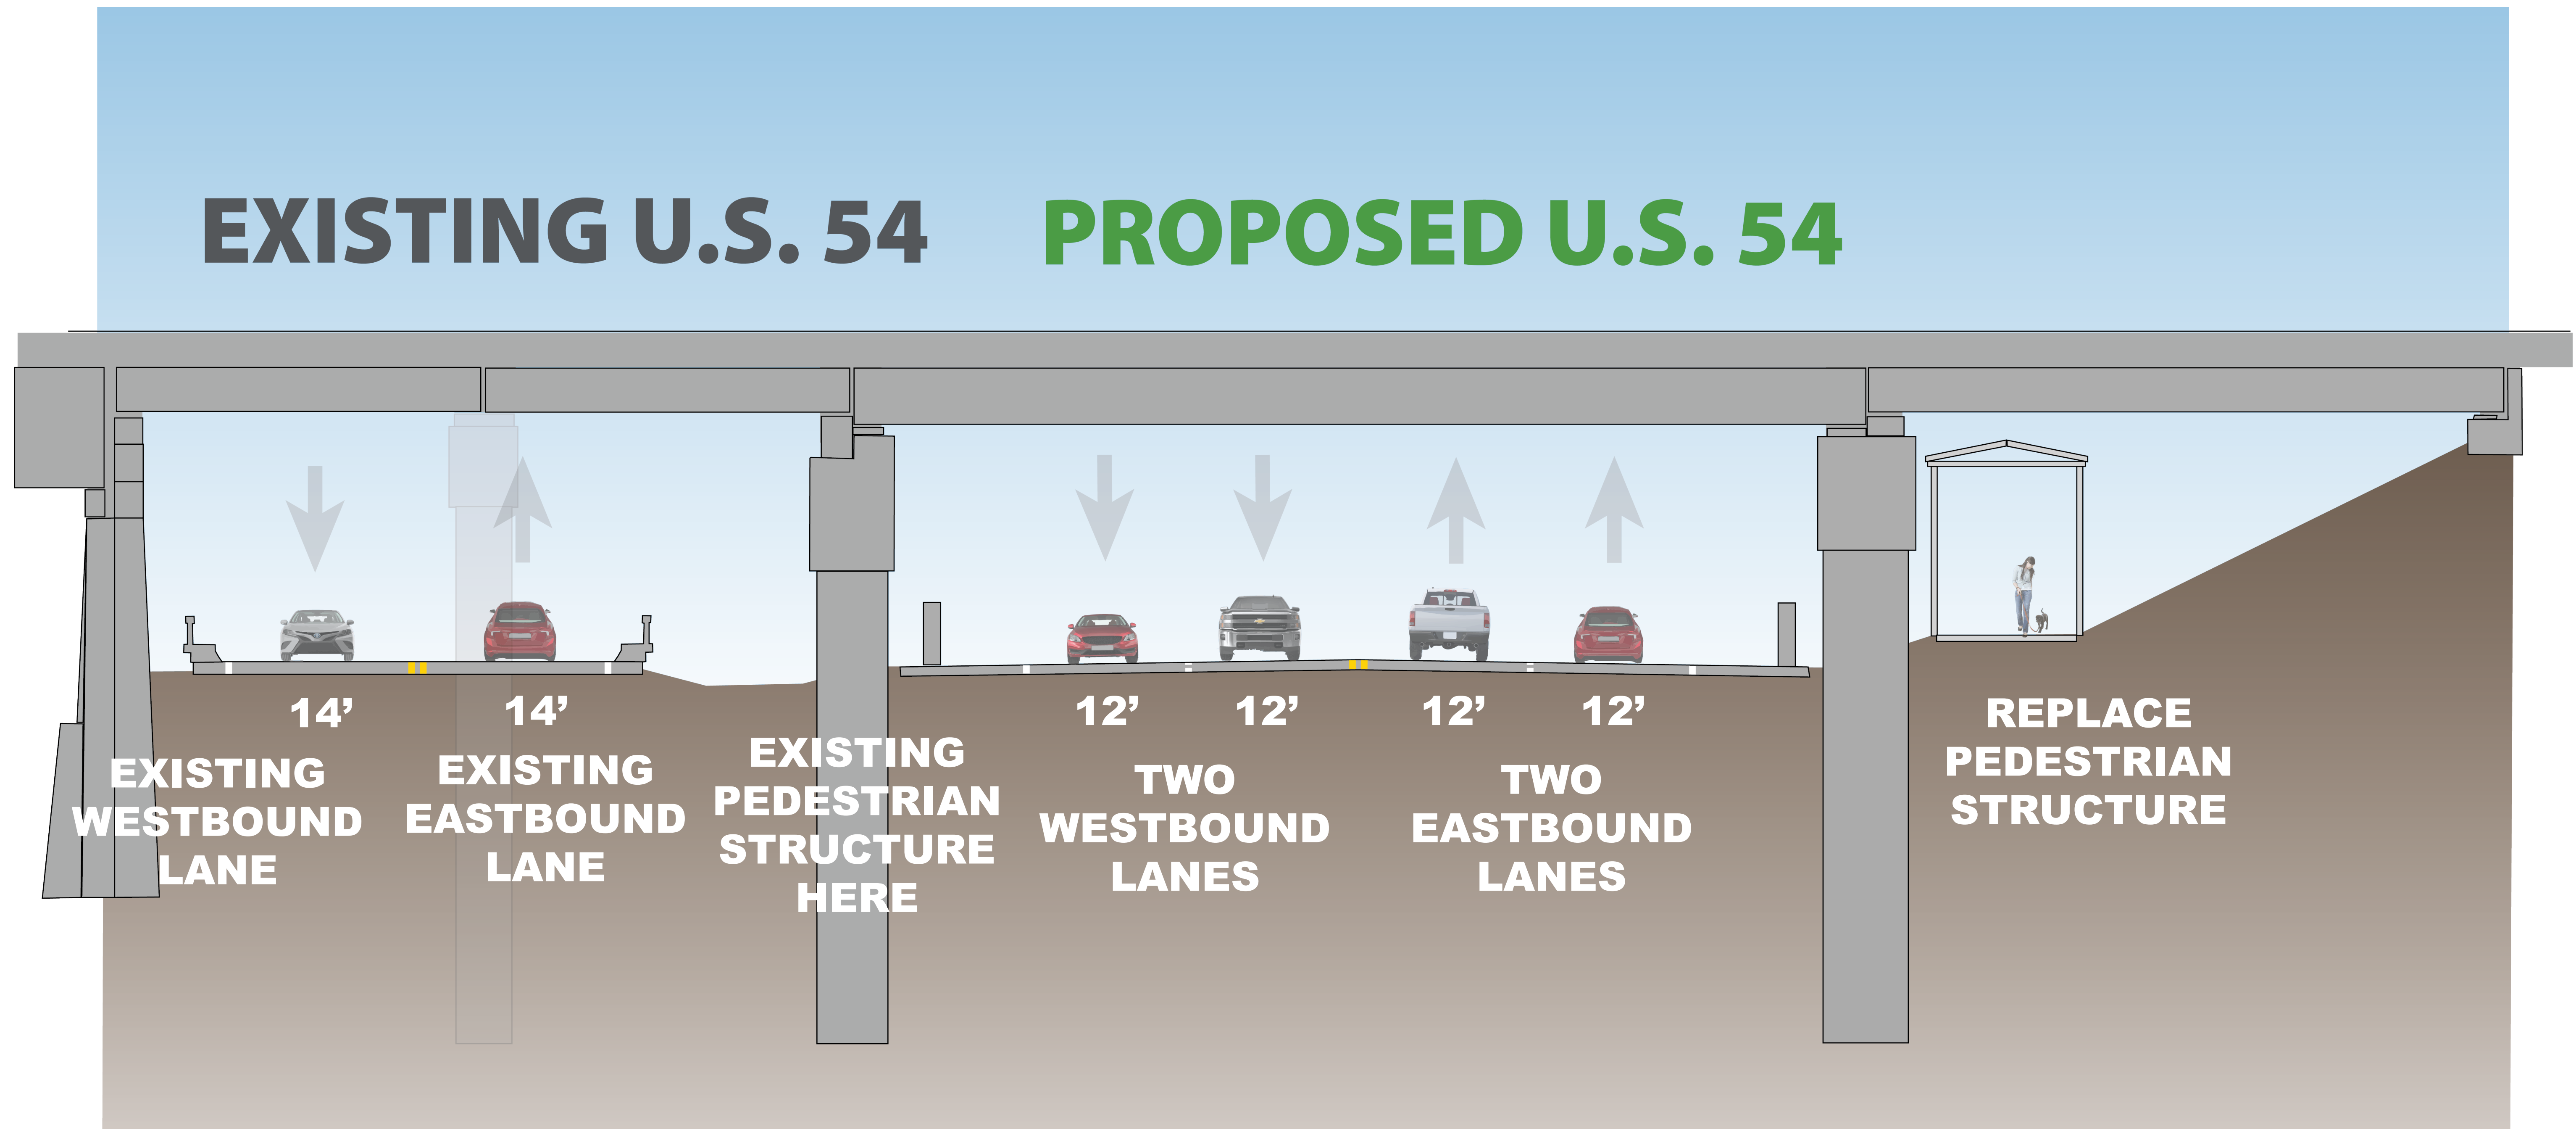

The proposed U.S. 54 bridge lanes would be built to the south of the existing U.S. 54 lanes, as seen in the highlighted blue area above.

**This would allow for the current U.S. 54 section to stay open during construction.**

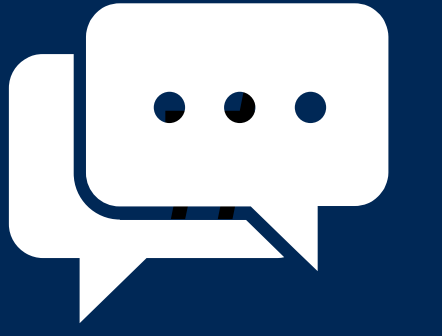

# Proposed Typical Section

The proposed U.S. 54 would have four lanes, two westbound and two eastbound. The bridge over U.S. 54 would be replaced, as would the pedestrian structure underneath.

# KDOT wants to hear from you!

Submit your comment today or online through **September 14, 2023.**
