785-874-8107

Eric Oelschlager
Area Engineer
Eric.Oelschlager@ks.gov
785-953-6011

PROJECT OVERVIEW

The Kansas Department of Transportation will reconstruct approximately 6 miles of K-23 in Sheridan County. The project will involve rebuilding the road into a 30-foot paved surface with 3-foot turf shoulders. In addition, the bridges over Sand Creek and the South Fork Solomon River will be replaced as well. The open house will provide information on construction timelines and detour routes.

Work will occur over multiple construction seasons, with project work happening off the road in 2024. In March 2025, KDOT will close the highway entirely, and a state route detour using I-70, U.S. 83 and U.S. 24 will be in effect. KDOT expects to reopen the road in late fall 2025, and the entire project is expected to be completed in early 2026.
