1/23/25 Form No. 219

## **Instructions for Form 0219**

This form must be completed, signed by the KDOT Area or Metro Engineer responsible for the project and submitted to the District office before any physical work begins on the project. For projects that do not require a SWPPP, this form does not require the signature of the Area or Metro Engineer and may be signed by a Construction Manager/Engineer or FEA for submittal to the District office.

Complete the header information with the KDOT Project and Contract #, the County or Counties where the project is located and the erosion control specification (e.g. 07-PS0360-R3) in the contract.

The KDHE Permit # is obtained from the NPDES permit issued for the project. Make one selection based on the disturbed area of the project being greater than 1 acre, less than one acre or the project disturbs no erodible surface. This information can be obtained from the contract bid items or referring to Standard Sheet LA852A. If the project disturbs one acre or more, requiring a Storm Water Prevention Plan from the Contractor, also check the box that a copy of the form and the Contractor's SWPPP with site map has been mailed to the KDHE. The address is provided at the bottom of this form. This mailing must be completed to meet the requirements established by the KDHE.

For projects with the bid item "SWPPP Design" the signature of the Area Engineer on this form is the basis for payment.
