

REFINERY IN SCOTT COUNTY

FARM SCENE NEAR TOPEKA

K92, FT. LEAVENWORTH

## KANSAS

## DO YOU KNOW

The state law requires the driver of any vehicle involved in an accident in which there is personal injury, or property damage of fifty dollars or more, to make a report to the Motor Vehicle Commissioner within twenty-four hours. Those reports are to be made on forms furnished by that Commissioner and are obtainable from all sheriffs, police departments and highway patrolmen. In case of an accident, notify the sheriff of the county, the chief of police of the nearest city, any highway patrol station or patrol-

You are required to have your driver's license with you at all times while operating a motor vehicle in

It is unlawful to pass on hills or curves or to operate your car without due regard to conditions of the road or the traffic thereon.

The law also requires every vehicle operating on the highway to carry legible registration plates, front and rear. There is no period of grace for attaching these plates. They must be on the car when it is in operation. If one tag is lost the owner should make application to the Motor Vehicle Commissioner for a set of "L" tags.

While there is no maximum speed law in Kansas for either trucks or pleasure cars, the law is so worded that officers can make arrests for speeding. Section 32 of chapter 283, Laws of 1937, provides that "no person shall drive a vehicle on a highway at a speed greater than is reasonable and prudent under the conditions then existing."

The slow driver is a distinct menace on our highways. Persons who insist on driving at twenty to twenty-five miles per hour in heavy traffic on a through highway cause congestion and that frequently results in other travelers' taking unsafe chances to

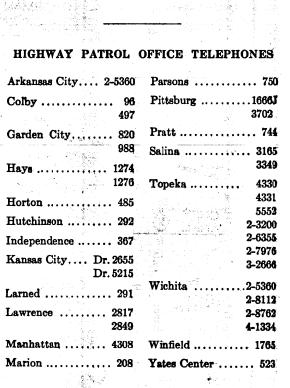

pass in heavy traffic. Failure of travelers to properly signal turns and stops is the cause of numerous accidents. Every car driver should familiarize himself with the state law on this subject and should properly signal his operations. The law is strict and drivers should exercise caution by stopping at the signs protecting main

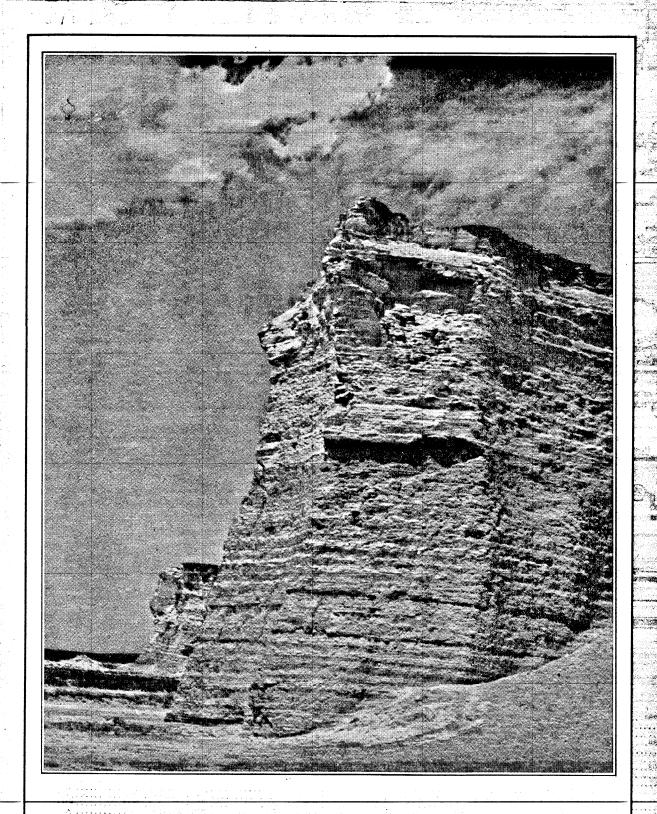

highways. The State Highway Patrol is conducting an intensive campaign against drunken drivers and all ar-

rests for such violations are vigorously prosecuted. Every member of the Kansas Highway Patrol has passed a course in Red Cross First Aid training and is qualified to render assistance to persons injured on highways. All highway patrol cars carry a first aid kit, extra gasoline, blanket, shovel, broom, fire extinguisher, hydraulic jack and tow chain. The pa-

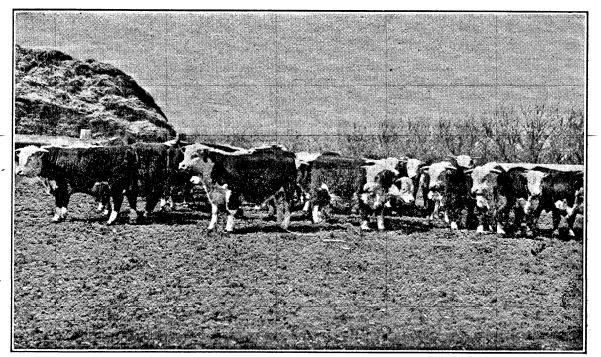

trolman will give assistance to distressed motorists. An automobile traveling 60 miles per hour goes 88 feet per second and requires 251 feet to stop with perfect four-wheel brakes on the best type of road surface under the most favorable conditions.
