

LIST OF TABLES

Table		Page
Table 2.3.1	Guidelines for Allowable Water Surface.....	2-7
Table 2.4.1	Guidelines for Design Recurrence Interval	2-8
Table 3.1-1	Guidelines for Selection of Hydrologic Methods.....	3-2
Table 3.2.4-1	Recommended Runoff Coefficients for Eastern Kansas	3-5
Table 3.2.4-2	Recommended Runoff Coefficients for Western Kansas	3-5
Table 3.5.3-1	Storm Duration and Antecedent Moisture Condition (AMC) for Flood Hydrograph Simulation	3-21
Table 3.5.4-1	NRCS Runoff Curve Numbers for AMC 2	3-23
Table 3.5.4-2	Equivalent Runoff Curve Numbers for AMC 2¼, 2½, 2¾ and 3.....	3-28
Table 3.5.6-1	Manning's Roughness Coefficients for Minor Streams and Floodplains	3-32
Table 4.4.3-1	Manning's Roughness Coefficients	4-9
Table 4.4.6-1	Normal Depth by Trial and Error in Example 4.4.6	4-13
Table 4.4.8-1	Normal Depth by Trial and Error in Example 4.4.8	4-15
Table 4.5-1	Permissible Shear Stress.....	4-17
Table 4.6.2-1	Normal Depth by Trial and Error in Example 4.6.2	4-22
Table 4.7.2-1	Normal Depth by Trial and Error in Example 12.7.2	4-26
Table 4.8.2-1	Normal Depth by Trial and Error in Example 4.8.2	4-31
Table 5.3-1	Capacities of Concrete Ditch Inlets and Pre-fabricated Interception Device (Steel) [Based on No Blockage]	5-6
Table 5.3-2	Capacities of #Inlet-Manholes, Special	5-8
Table 6.1.4.1-1	Restraint against Uplift for Upstream Ends of Large CMP Culverts	6-4
Table 6.2.4-1	Hydraulic Dimensions for Pipe Culverts Embedded to 12-inch Depth	6-10
Table 6.3.4-1	Entrance-Loss Coefficients for Culvert Entrances	6-17
Table 6.3.4-2	Manning's Roughness Coefficients for Culverts.....	6-19
Table 6.3.4-3	Critical Depth in a Circular Pipe	6-21
Table 6.3.4-4	Critical Flow in a Circular Pipe Embedded to 12-inch Depth.....	6-22
Table 6.3.5.1-1	Headwater-Discharge Relationship for Pipe Culverts with Metal Type I End Sections under Inlet Control	6-29
Table 6.3.5.1-2	Headwater-Discharge Relationship for Pipe Culverts with Concrete Type I End Sections under Inlet Control*	6-31
Table 6.3.5.1-3	Headwater-Discharge Relationship for Pipe Culverts with Metal Type III End Sections under Inlet Control	6-32
Table 6.3.5.1-4	Headwater-Discharge Relationship for Pipe Culverts with Concrete Type III End Sections under Inlet Control	6-32
Table 6.3.5.1-5	Headwater-Discharge Relationship for Pipe Culverts with Type IV End Sections under Inlet Control	6-37
Table 6.3.5.2-1	Headwater-Discharge Relationship for RCB Culverts under Inlet Control	6-37
Table 6.3.6-1	Hydraulic Characteristics of KDOT End Sections for Pipes.....	6-39
Table 6.5.1-1	Stage-Area Data for Storage Site	6-44
Table 6.5.1-2	Headwater Elevations at Selected Discharges.....	6-45
Table 6.5.1-3	Culvert Discharges at Selected Headwater Elevations	6-46
Table 7.1.1-1	Design Criteria for Allowable Spread for 10-Year Recurrence Interval.....	7-2
Table 7.1.4-1	Hydraulic Conveyance of Gutter and Street.....	7-4
Table 7.1.5-1	Captured Discharges for Concrete Gutter Inlet, Type B Gutter Inlet and Type 12 Combination	

	Inlet.....	7-5
Table 7.1.5-2	Captured Discharges for 5.0-ft Type 22 Curb Inlet on Roadway with Cross-slope of 1.6% ...	7-6
Table 7.1.5-3	Captured Discharges for 5.0-ft Type 22 Curb Inlet on Roadway with Cross- slope of 3.1% ..	7-7
Table 7.1.5-4	Captured Discharges for 10.0-ft Type 22 Curb Inlet	7-8
Table 7.1.5-5	Captured Discharges for 15.0-ft Type 22 Curb Inlet	7-9
Table 7.1.6-1	Capacities of KDOT Inlets in Sag Locations	7-10
Table 7.2.4-1	Local-Loss Coefficients for Flow through Inlet Boxes, Access Manholes, and Junction Boxes	7-18
Table 8.2-1	Design Data for RCP	8-4
Table 8.3-1	Properties of CMP, and CMMAC	8-6
Table 8.3-2	Properties of SRSP	8-6
Table 8.3-3	Guidance for Estimation of the Modulus of Soil Reaction, E'	8-8
Table 8.3-4	Design Data for CMP with 2-2/3 x 1/2 in. Corrugations, E' = 400 psi	8-9
Table 8.3-5	Design Data for CMP with 2-2/3 x 1/2 in. Corrugations, E' = 750 psi	8-10
Table 8.3-6	Design Data for CMP with 2-2/3 x 1/2 in. Corrugations, E' = 1500 psi	8-11
Table 8.3-7	Design Data for CMP with 3 x 1 in. Corrugations, E' = 400 psi	8-12
Table 8.3-8	Design Data for CMP with 3 x 1 in. Corrugations, E' = 750 psi	8-13
Table 8.3-9	Design Data for CMP with 3 x 1 in. Corrugations, E' = 1500 psi	8-14
Table 8.3-10	Design Data for CMP with 5 x 1 in. Corrugations, E' = 400 psi	8-15
Table 8.3-11	Design Data for CMP with 5 x 1 in. Corrugations, E' = 750 psi	8-16
Table 8.3-12	Design Data for CMP with 5 x 1 in. Corrugations, E' = 1500 psi	8-17
Table 8.3-13	Design Data for SRSP with 3/4 x 3/4 x 7-1/2 in. Corrugations, E' = 400 psi	8-18
Table 8.3-14	Design Data for SRSP with 3/4 x 3/4 x 7-1/2 in. Corrugations, E' = 750 psi	8-19
Table 8.3-15	Design Data for SRSP with 3/4 x 3/4 x 7-1/2 in. Corrugations, E' = 1500 psi	8-20
Table 8.3-16	Design Data for CMMAC with 2-2/3 x 1/2 in. Corrugations.....	8-21
Table 8.3-17	Design Data for CMMAC with 3 x 1 in. Corrugations	8-22
Table 8.3-18	Design Data for CMMAC with 5 x 1 in. Corrugations	8-22
Table 8.4-1	Properties of CAP.....	8-24
Table 8.4-2	Guidance for Estimation of the Modulus of Soil Reaction, E'	8-26
Table 8.4-3	Design Data for CAP with 2-2/3 x 1/2 in. Corrugations, E' = 400 psi	8-27
Table 8.4-4	Design Data for CAP with 2-2/3 x 1/2 in. Corrugations, E' = 750 psi	8-28
Table 8.4-5	Design Data for CAP with 2-2/3 x 1/2 in. Corrugations, E' = 1500 psi	8-29
Table 8.4-6	Design Data for CAP with 3 x 1 in. Corrugations, E' = 400 psi.....	8-30
Table 8.4-7	Design Data for CAP with 3 x 1 in. Corrugations, E' = 750 psi.....	8-31
Table 8.4-8	Design Data for CAP with 3 x 1 in. Corrugations, E' = 1500 psi.....	8-32
Table 8.4-9	Design Data for CAPA with 2-2/3 x 1/2 in. Corrugations	8-33
Table 8.4-10	Design Data for CAPA with 3 x 1 in. Corrugations.....	8-34
Table 8.5-1	Thermoplastic Pipes (Maximum Fill Height (ft) for Sn-90)	8-35
