

2402 – WATER FOR MISCELLANEOUS USES

SECTION 2402

WATER FOR MISCELLANEOUS USES

2402.1 DESCRIPTION

This specification covers water requirements for use with:

- Aggregate Base
- Cement Treated Base
- Cold In-Place Recycled Asphalt Construction
- Earthwork Compaction
- Emulsified Asphalt
- Flexible Pavement
- Fly Ash Treated Subgrade
- Hydrated or Quicklime
- Lime Treated Subgrade
- Stabilized Shoulders
- Subgrade Modification

2402.2 REQUIREMENTS

Use water that is reasonably clear, compatible with the materials to which it is to be added and free from excessive quantities of oil or vegetable matter. Approval of the water source by the Engineer is required before use.

2402.3 METHOD OF TEST

None Specified.

2402.4 PREQUALIFICATION

None Required.

2402.5 BASIS OF ACCEPTANCE

Acceptance of water will be based on visual examination by the Field Engineer and its performance during the progress of the work.
