

**KANSAS DEPARTMENT OF TRANSPORTATION  
SPECIAL PROVISION TO THE  
STANDARD SPECIFICATIONS, EDITION 2015**

**SEASONAL LIMITATIONS (Overlays)**

To ensure that the Kansas Department of Transportation's State Wide Overlay projects are completed to coincide with the maintenance operations, this Special Provision is to be included only in the KDOT State Wide Overlay Program.

It is the intent that this overlay be completed during the first construction season after which this project is let. In order to assure the KDOT that this project will be completed during this period, the "Notice to Proceed" will be issued so that working days will elapse on or before October 1 for overlays with a nominal compacted thickness of one inch or less, and October 15 for thickness greater than one inch of the first construction season following the letting.

On projects that involve asphalt sealing in conjunction with an overlay, the weather and seasonal limitations will be in accordance with the standard specifications.

On projects that involve asphalt sealing only, the "Notice to Proceed" will be issued so that working days will elapse on or before the end of the sealing season.
