How to read the STIP Amendments

STIP amendment information provides the same general project information and has the same format as the STIP project lists (Appendix A & C) with one addition- the disposition. The disposition information is provided to explain the change or changes being made to the project. Following this diagram is a list of the change dispositions abbreviations used in amendments with a brief description of each. Amendments to the STIP document are for significant changes to a project that require concurrence in the change from FHWA and/or FTA. Examples are the addition or deletion of a project, a major change in project cost, change in project/project phase initiation dates, a major change in design concept or design scope, and changes in funding. Below is a diagram that identifies the fields provided for projects listed in amendments. In addition, to meet FHWA requirements an amendment requires re-demonstration of fiscal constraint- this is achieved with the Cash Flow provided previous to this page.
